Landing Your Dream Job Top Employability Skills for New Grads

17 April 2025

Today's Speaker

Irvandias Sanjaya,
S.Psi., CCP., CPS., C.CTr.

Education:

- Bachelor of Psychology - Universitas Gadjah Mada (2019)
- Academic Fellowship Program - Arizona State University (2018)
- Summer Exchange Program - Thammasat University (2016)

Accomplishment :

- LinkedIn Power Profile 2018

Professional Experience:

- Career Coach & Consultant at Rumah Siap Kerja (2021 - Present)
- Educator Expert at Relasi Diri (2024 - Present)
- Career Coach at RevoU (March 2021 - September 2024)
- Co-Founder Yayasan Disabilitas Berkarya Setara (2022 - Present)
- Career Consultant at MyEduSolve (August 2021 - December 2021)

Be Ready For The Session

To obtain an optimum learning result,
let's follow these ground rules!

Raise Hand if there's
concern/questions along
the way

Actively participate
throughout the session
(**reciprocal approach**)

Turn off devices ensure

Career Advice
New Graduates 2025

So I just graduate from college, but...
Will My Degree Even Matter in 2025?

First thing first...

On a scale of 1-5, **how ready are you to face post-graduation life a.k.a real-world of workplace life?**

There are no right or wrong answers, today we will do a lot of reflection and learn how to prepare for post-graduation life 🤔

Now, let's talk about the Differences between College Life vs Workplace Life

Differences	College Life 🏡	Workplace Life 💪
Daily Schedule and Routine	Schedule and daily routine could be <u>flexible</u> (depending on your campus)	<u>Structured</u> schedule with set hours and specific workdays, less flexibility.
Responsibility and Accountability	<u>More freedom</u> in managing time for <u>assignments</u> and <u>exams</u> .	<u>Accountability for tasks</u> with less flexibility, <u>crucial deadlines</u> and <u>quality standards</u> .
Supervision and Autonomy	<u>Autonomy in choosing courses</u> with guidance from professors.	<u>Manager or supervisor sets expectations</u> , provides direction, and evaluates performance.
Evaluation and Feedback:	<u>Grades and feedback from professors</u> on academic performance.	<u>Performance evaluations tied to job performance</u> + work ethic, impacting career progression
Learning vs. Applying Knowledge:	<u>Focus on coursework, theory</u> , and acquiring a broad knowledge base.	Apply knowledge and skills gained in college to <u>solve real-world problems</u> and contribute to the organization or industry.

Top 3 Reasons Why Fresh Graduates Do Not Get Hired

Fresh graduates often lack relevant skills

Even if you are fresh out of the university, you should have acquired important skills that will help you bring value to the organisation you are applying to.

Fresh graduates face steep competition

As the number of college graduates and degree holders has increased during the past years, so has the number of job applicants vying for the same position.

Fresh graduates often have little or no work experience

It may be disheartening for you to see job ads that highlight junior roles requiring at least a year of work experience This also called **experienced paradox**.

Source: <https://www.jobstreet.com.my/career-resources/job-hunting/top-3-reasons-why-fresh-graduates-do-not-get-hired/>

Career journey is indeed a challenging journey.

3.7 Million unemployed aged 18-24
78% with min high school diploma

56% of graduates feel poorly prepared
To enter the workforce

59% of graduates switch jobs within first 3 years
35% SWITCH ≥ 2 TIMES

One of the reasons why the career journey becomes difficult is: **procrastination.**

Did you know that **92% of employers believe soft skills matter** as much or more than hard skills?

Employers believe it's more important to hire for:

Soft Skills

Soft Skills + Hard Skills

Hard Skills

Source: LinkedIn's Global Talent Trends
report

What is Soft Skill?

Soft skills are described as a **person's attributes and interpersonal skills**, which influence how they complete a task, work in a team, deal with customers or clients, and manage conflict resolution.

The main difference between hard skills and soft skills is that, while technical or hard skills are relevant to the tasks you might do in the role, **soft skills refer to how you perform those tasks in a team context.**

Consider the following situational examples of how soft skills may present in the workplace:

Situation	Soft Skills
Being assigned a deadline and completing the task on time	Time, Energy, Task Management
Adapting the onboarding process for a new employee as you can see they're struggling to understand and keep up with the training	Empathy and Patience
Talking through pain points with a disgruntled client until you find a middle ground	Conflict Resolution

Every role will value and require different soft skills, meaning there's no one size fits all approach 😊

You don't have to wait after graduating to practice these skills

And you will thank yourself if you practice these skills NOW 😊

Communication Skills

Effective written and verbal communication **is crucial in almost every profession.**

College coursework, presentations, group projects, and public speaking opportunities can help you hone these skills.

Collaboration

Group projects and club participation in college provide opportunities to work collaboratively with diverse teams, **which is a skill valued in the workplace.**

Time Management

Balancing coursework, extracurricular activities, and personal life **teaches you time management and organizational skills**, which are essential for success in any profession.

Critical Thinking

College education **encourages critical thinking** by challenging you to analyze complex issues, evaluate evidence, and propose solutions to problems.

Research + Information Literacy

Research skills involve finding, evaluating, and synthesizing information. College assignments and research projects provide opportunities to develop these skills.

Time Management

In the digital age, **proficiency with various software applications and tools is essential.** College coursework often requires using technology for research, presentations, and data analysis.

Job Market Landscape 2025

Skills Over Degree

Employers care more about **skills you can show** than your **GPA** or lots of job experience.

4 in 5 employers prioritize **demonstrated abilities** over academic credentials.

In Jakarta, **65% companies** care more about a **candidate's skills** than their field of study.

of employers now
prioritize skills
over degrees

Top Technical Skills 2025

**Digital Literacy
and Fluency**

**Data Literacy and
Analytics**

**AI and Machine
Learning**

Quick Question

“Which of these three are you familiar the most?”

Digital Literacy and Fluency

Digital literacy means really understanding and **being good at using all kinds of digital tools and tech**, not just knowing how to use a computer.

For example for developers...

Front-end Tools

Programming Language

Web Language

For example for educators...

Graphic Designer Tools

Canva
Picsart

Video Editor Tools

Learning Tools

Kahoot!
QUIZIZZ

Benefits of Digital Literacy

Drives Innovation and Adapts to Change:

It means knowing how tech affects business and using that to help come up with new ideas.

Foundational for Utilizing Digital Tools:

It's about using lots of digital tools well to work better and help the company run smoother.

Crucial for Remote Work Environments:

Ability to use new tech and improve work online as remote work grows.

WORKING

How to Grow Digital Literacy

1) Engage with a Wide Range of Digital Tools & Platforms

Learn to **use the software and digital tools common in the industry** you want to work in.

For example, **learn AutoCAD and SAP ERP for manufacturing jobs or Google Analytics 4 and SEMrush for digital marketing.**

How to Grow Digital Literacy

2) Stay Informed About the Latest Technological Trends

Keep up with industry news and new tech to make sure your skills stay useful.

The World Economic Forum says **many skills will soon be outdated**, so you need to keep learning new ones.

How to Grow Digital Literacy

3) Practice Adapting to New and Emerging Technologies

Use online learning platforms to easily pick up specific tech skills.

Getting recognized certifications can boost your skills and make recruiters notice you

Do internships or personal projects in your field to show off your digital skills and get real experience

For example, did you know you can built website
THIS GOOD without any coding knowledge?

Top Technical Skills 2025

**Digital Literacy
and Fluency**

**Data Literacy and
Analytics**

**AI and Machine
Learning**

Data Literacy and Analytics

The ability to **interpret and analyze complex datasets** to **identify hidden patterns** and trends.

Enable individuals to **transform raw data into actionable insights**

Effectively communicate these insights to stakeholders to facilitate informed decision-making

Urgency of Data Analytics

Central to decision-making across all sector:

In 2025, businesses will use data for every choice, talk, and task they handle.

Massive big data (182 zettabytes in 2025):

As tons more data piles up in all industries, we really need people who are good with data and analytics.

Fundamental requirement for various positions:

Knowing how to use data and analytics is now important for many jobs, not just data science ones.

Business Problem

How Data Analytics Help

Low Sales

Data analytics can find out why sales are dropping by looking at **customer buying patterns**.

High Costs

It can spot where a company is spending too much by **analyzing expense data**.

Customer Loss

Analytics can figure out why customers are leaving by **studying their feedback and behavior**.

Slow Delivery

It can **track shipping data** to find and fix delays in getting products to customers.

Business Problem

How Data Analytics Help

Poor Marketing

Data can **show which ads work best** by comparing how people respond to them.

Stock Issues

Analytics can **predict what products to keep in stock** by looking at past sales trends.

Employee Turnover

It can uncover why workers quit by **analyzing job satisfaction and workload data**.

Fraud Risk

Data analytics can **detect weird patterns in transactions** to catch fraud early.

#1 Case Study

Tesco's Data-Powered Turnaround

Problem:

Trailing behind Sainsbury's in market share, Tesco needed deeper customer insights to compete.

How Data Helps:

1. Launched Clubcard loyalty program to track purchases/habits
2. Used machine learning to predict behavior + personalize offers
3. Segmented customers for targeted promotions (e.g., discounts for budget shoppers)
4. Optimized inventory with predictive demand forecasting

Result:

- Overtook Sainsbury's within 6 months (market share: 19% → 21.2%)
- 159% pre-tax profit boost from loyal Clubcard shoppers

#2 Case Study

Microsoft's Workspace Efficiency Boost

Problem:

Relocating 1,200 engineers risked disrupting collaboration—would consolidating offices actually improve teamwork?

How Data Helps:

1. Used Workplace Analytics (Office 365 metadata) to track meeting habits
2. Measured travel time + frequency before/after the move
3. Focused on hard metrics (not surveys)

Result:

- 46% less time wasted walking to meetings
- 100+ hours/week saved (\$520K/year in productivity)
- More (but shorter) meetings → faster decisions

Most Needed Software/Skills

Description

Microsoft Excel

Proficiency in Excel is considered a crucial component of data literacy and analytics skills

SQL (Structured Query Language)

This is essential for database management and working with data

Python and R

These are important programming languages for statistical analysis and programming in the context of data analytics

Tableau and Power BI

These are highlighted as significant data visualization platforms that employers seek proficiency in

Most Needed Software/Skills

Description

Google Analytics

Familiarity with Google Analytics is also beneficial for data analysis

Google Data Studio

The ability to create simple dashboards using Google Data Studio is seen as a valuable skill for recruiters

Low-code tools for data analysis and visualization

These are important programming languages for statistical analysis and programming in the context of data analytics

**Unfortunately, we can't go on the details
of the software here...**

**This is something you have to explore
by yourself**

Analysis Type to Learn

Type of Analysis

Fundamental Statistical Principles

Descriptive statistics (mean, median, mode, standard deviation), understanding different types of data, and basic inferential statistics

Turn Data into Actionable Insights

The ability to transform raw data into actionable insights that can inform decision-making is highly valued

Data Visualization

Creating dashboards and using data visualization platforms

Data Communication

Being able to effectively communicate insights derived from data to stakeholders is also essential

Example of Good Data Visualization

Gig Economy

Most Gig Workers (Millions) in Indonesia are in Transportation Sector

Number of Worker

2.3M

1.7% of 140 Million
workforce

Contribution to GDP

\$7 Billion
Rp99 Trillion

yearly

Permana and Izzati using Sakernas (National Labor Force Survey) data in 2019

Example of Good Data Visualization

Gig Economy

Number of Woman Workers per Job Status (Millions)

Key Factors Contributing to Disparity

Employee:

Women prefer formal employment due to its stability, benefits, and alignment with societal norms around "acceptable" work for women.

Contributing Family Worker:

Aligns with traditional gender roles, offers flexibility, and requires no formal skills, making it more accessible for women in rural areas.

Life...

Example of Good Data Visualization

Microsoft Income Statement

Example of Good Data Visualization

Microsoft Revenue by Segment

Example of Good Actionable Insight

Education

The Influencers

The influencers adalah tipe peserta yang **sangat aktif selama pelatihan**, baik dalam sesi diskusi kelompok maupun sesi *lecture* bersama pemateri.

Walaupun sangat aktif, mereka cenderung memiliki **performa individu maupun kelompok yang rendah**.

Sebagian besar tipe peserta ini **sudah memiliki bisnis** dan merupakan **kelompok ungu dan abu-abu**

REKOMENDASI PENGEMBANGAN DIRI:

- Berikan feedback yang konstruktif dan spesifik tentang performa mereka dalam menjalankan bisnis.
- Berikan tantangan yang sesuai dengan tingkat kemampuan dan bidang bisnis mereka.
- Libatkan mereka dalam kegiatan yang membutuhkan kolaborasi dan komunikasi dengan orang lain. Misalnya, minta mereka untuk berbagi pengalaman atau tips bisnis, atau mengadakan diskusi lintas kelompok.

The Emerging Gig Economy in Indonesia: Statistics, Impact, and Future Outlook

Indonesia's gig economy has experienced substantial growth in recent years, reshaping the traditional employment landscape and contributing significantly to the nation's digital economic transformation. This research report examines the statistical landscape of Indonesia's gig economy, analyzing its size, demographic composition, economic impact, and the challenges faced by gig workers. As Indonesia continues its digital evolution, understanding these patterns becomes crucial for policymakers, businesses, and workers alike.

Size and Scope of Indonesia's Gig Economy

The gig economy in Indonesia has grown significantly in recent years, although precise measurements vary across different studies. According to research by Permiana and Izzati using BPS's (National Labor Force Survey) data, Indonesia had approximately 2.33 million gig workers in 2019, representing about 1.7 percent of the country's total workforce [1]. This figure encompasses workers primarily in the transportation sector and other service industries. More specifically, their analysis identified around 1.23 million workers (0.9% of the total workforce) in the transportation sector, which includes online motorcycle taxi drivers, couriers, and food delivery personnel working for platforms like Gojek and Grab [1]. Additionally, approximately 1.1 million workers (0.8% of the total workforce) were engaged in other service sectors, including online tutors, software developers, translators, copywriters, and other remotely delivered services [1].

However, it's important to note that these figures likely represent conservative estimates. A survey conducted by the Center for Employment and Labor Studies at the University of Indonesia in 2020 estimates a much larger figure of around 10 million gig workers in Indonesia [2]. This substantial discrepancy highlights the challenges in accurately measuring this sector, particularly due to its informality and the limitations of traditional labor surveys. The BPS's data, which is released twice yearly, has recognized limitations in precisely assessing the number of gig workers in Indonesia [2].

The distribution of gig workers across Indonesia is notably uneven, with a significant urban concentration. Research indicates that approximately 70.57% of gig workers are located in urban areas, compared to just 23.42% in rural regions [2]. This urban-rural disparity can be attributed to several factors, including better digital infrastructure in cities, higher population density leading to greater service demand, and the gap in access to digitalization between urban and rural areas [2].

Top Employability Skills for New Graduates in 2025

I. Executive Summary

This report examines the critical employability skills required for new graduates entering the job market in 2025. The analysis reveals that the professional landscape is being significantly reshaped by rapid technological advancements, shifting economic conditions, and evolving expectations from employers. To succeed in this dynamic environment, new graduates must cultivate a blend of technical and soft skills. Key technical skills identified as crucial include data literacy and analytics, proficiency in artificial intelligence and machine learning, strong digital fluency, software development capabilities, and cybersecurity awareness. Equally important are core soft skills such as effective communication, teamwork and collaboration, problem-solving and critical thinking, emotional intelligence, adaptability, and leadership. Furthermore, emerging competencies like continuous learning, creativity, and innovation, ethical judgment, and an understanding of environmental stewardship are gaining prominence. The report also addresses the existing skills and experience gap faced by many new graduates and suggests proactive strategies for development. Ultimately, aligning skill development with strategic job search methods will be paramount for new graduates to achieve successful career transitions in 2025 and beyond.

II. The Evolving Landscape of the Job Market in 2025

The job market in 2025 is characterized by significant transformations driven by a confluence of factors, most notably technological advancements, economic shifts, and changing employer expectations. Understanding these dynamics is crucial for new graduates to strategically position themselves for success.

- **Technological Advancements as a Primary Driver of Change:** The integration of advanced technologies, particularly artificial intelligence (AI), machine learning (ML), and automation, is fundamentally altering industries and the nature of work. This rapid adoption is not only generating demand for specialized technical roles but also impacting existing positions across various sectors. Consequently, even graduates in non-technical fields will increasingly need a foundational understanding of AI and ML concepts and the ability to effectively utilize AI-powered tools to enhance their productivity. For instance, the ability to leverage AI and ML can streamline operations and boost individual productivity, allowing professionals to focus on business growth rather than routine tasks. The World Economic Forum's Future of Jobs Report 2025 highlights the increasing demand for AI and ML specialists, alongside big data specialists and research

How to master Artificial Intelligence

Proficiency in Utilizing AI-Powered Tools:

Able to use AI tools well to work better and make things run smoother.

Prompt Engineering:

Smartly giving AI the right inputs to get accurate results and boost productivity with generative AI.

Now, let's focus on this one

Prompt Engineering

The ability to **strategically craft inputs** for AI models **to achieve desired and accurate outputs**

Good Prompt Aspect

Definition

Example

1) Instructions

Give the model distinct guidelines regarding the task.

"Write an essay in 600 words, analyzing the effects of global warming on marine life"

2) Context

Provides framework for generating relevant content

"In recent decades, global warming has undergone significant shifts, leading to rising sea levels, increased storm intensity, and changing weather patterns. These changes have had a severe impact on marine life. Write an essay in 600 words analyzing the effects of global warming on marine life."

Good Prompt Aspect

Definition

Example

3) Input Data

Any piece of information provided as part of prompt

"You have been provided with a data set containing temperature records and measurements of sea levels in the Pacific Ocean. Write an essay in 600 words, analyzing the effects of global warming on marine life in the Pacific Ocean."

4) Output Indicator

Offers benchmarks for assessing attributes of the output (e.g the tone, style, length, and other qualities you desire from the output)

"The output generated should be an essay of 600 words. It will be evaluated based on the clarity of the analysis and incorporation of relevant data or case studies"

Create an SEO optimized article for this:

Instructions

Keyword = [_]

Content Outline = Insert headings + article outline here

For creating content, do this:

- SOURCE CONTEXT: Source Context = Write as Julian Goldie, who is an SEO Entrepreneur, author, and online educator. He is the founder of successful 7-figure link building agency with a team of 50 people, which he build from the ground up. Julian is also a thought leader in the field of AI and SEO. He has released two best-selling books on Amazon, "SEO Link Building Mastery" and "Agency Marketing Mastery". His Udemmy courses have attracted over 50,000 students and has over 70,000 subscribers on YouTube.

Julian Goldie's world class SEO Training in the SEO Elite Circle here:

<https://go.juliangoldie.com/buy-mastermind>

This is by Julian Goldie. If you want a FREE SEO Strategy session with Julian, book a call here:

<https://go.juliangoldie.com/strategy-session>

**Context +
Input Data**

- Easy to read + feels conversational
- UK grammar
- Add FAQs
- Add headers/subheaders
- Keyword in the first line/last line
- Keep it real, keep it fresh, and keep it engaging.
- 1st person
- Chop up complex tips into bullet points, lists, and bold highlights. This makes it a breeze for both people and search engines to skim through.
- Springkel in stories and examples like you're sharing insights over coffee with a pal.
- In the tonality of Alex Homrmozi, write this article no fluff, nothing cringe, every sentence on a new line, no formal language, keep it neutral.
- Kick off with a real question and worries your audience faces. Use plain talk to hit the mark, skipping the tech talk unless it's what everyone's chatting about.
- Include keyword in headings + insert relevant semantically relevant keywords + LSIs throughout the content
- Simplify the language a bit more too

Top Soft Skills 2025

**Communication
Skills**

**Adaptability and
Resilience**

**Problem-Solving
and Critical
Thinking**

Communication Skills

The ability to **clearly and effectively exchange information, ideas, facts, and perspectives**, both verbally and in writing

Urgency of Communication Skills

Bedrock of Professional Interaction:

Good communication is key to success in work interactions.

Top Employer Requirement:

Employers consistently rank communication skills among the top attributes they seek in new graduates

Essential for Remote Work:

As remote and hybrid work grow, you need strong online communication skills.

Expected Behavior

Communication Skills

1) Articulating ideas concisely

2) Persuasion and influencing skills to articulate viewpoints convincingly and contribute to productive discussions

3) Listening actively to others

4) Respectful communication across different hierarchical levels

5) Conveying information accurately

6) The ability to adapt communication styles to different generations and audiences is also important

7) In the era of remote work, strong virtual communication skills are increasingly necessary

How to Grow **Communication Skill**

Practice Actively in Various Contexts

Engage in verbal communication as much as possible (discussions, asking questions, and presenting ideas)

Enhance Written Communication

Practice writing clearly and effectively in various formats, such as emails, reports, and presentations

Develop Active Listening Skills

Make a conscious effort to listen attentively to others' perspectives. Try maintaining eye contact, nodding, and asking clarifying questions to ensure understanding.

Seek and Utilize Feedback

Actively solicit feedback on your communication skills from peers, mentors, professors, or supervisors.

Top Soft Skills 2025

**Communication
Skills**

**Adaptability and
Resilience**

**Problem-Solving
and Critical
Thinking**

Quick Question

“Have you ever heard of the term
‘Resilience’?”

Resilience

The ability to **adapt well in the face of adversity**, trauma, tragedy, threat, or significant sources of stress, and **to bounce back stronger** from difficult experiences.

– American Psychological Association (APA)

*Resilience is something that everyone already has. **You have already made it through 100 percent of your hardest days**, and that in itself shows resilience.*

Molly Birkholm

On his book "Building Your Resilience: Finding Meaning in Adversity Course Book"

Benefits Resilience

Economic Shifts and Uncertainty:

2025's job market may be tough, so stay resilient, keep learning, and stand out in the competition.

Rapid Pace of Change:

Jobs are changing fast—graduates must adapt quickly to new tools and skills to stay relevant.

Lifelong Learning Imperative:

Keep learning and stay resilient—your career depends on adapting, not just avoiding failures.

Source

Resilience (From Relations)

Empathy

Connections that provide empathic support so that we can release negative emotions

Work Surge

Connections that help us shift work or manage surges

Politics

Connections that help us make sense of people or politics in a situation

Pushback

Connections that help us find the confidence to push back and self-advocate

Vision

Connections that help us see a path forward

Perspective

Connections that help us maintain perspective when setbacks happen

Purpose

Connections that remind us of the purpose or meaning in our work

Humor

Connections that help us to laugh at ourselves and the situation

How to Cultivate **Resilience**

Adopt a Growth Mindset

See failures as lessons, stay curious, and grow through challenges to succeed long-term.

Develop Stress Management Techniques

Master stress with tricks like 4-7-8 breathing and EQ—it's key to handling pressure.

Build Self-Awareness

Know your strengths and weaknesses to tackle challenges and succeed long-term.

Seek Support

Join peer groups or find mentors to boost confidence and beat self-doubt.

Top Soft Skills 2025

Communication Skills

Adaptability and Resilience

Problem-Solving and Critical Thinking

Problem-Solving & Critical Thinking

The capacity to analyze situations objectively, identify key issues and challenges, evaluate various options, and develop effective solutions

Urgency of Problem-solving & Critical Thinking

Complex Challenges:

Graduates need positivity, creativity, and adaptability to solve tough workplace problems.

Automation and AI:

These are unique human skills that AI can't copy, so they're becoming more valuable for workers.

Innovation and Growth:

Creative thinking helps graduates solve problems in new ways

Tools for Problem-solving & Critical Thinking

Problem Identification

Idea Generation

Green Light & Red Light Thinking

The Affinity Diagram

Logic Tree

**The Interrelationship
Diagram**

**Decision-making
Matrix**

Critical Thinking Tools

Green Light & Red Light Thinking

(Step 1) Green Light Thinking: Freely brainstorm ideas (no judgment) as many as possible.

(Step 2) Red Light Thinking: Critically evaluate & refine the best ones.

Critical Thinking Tools

Green Light & Red Light Thinking

Example

Green:

- Let's sell pizza on the moon!
- Midnight delivery
- Drone based pizza delivery

Red: Offer midnight delivery.

The Thinking Mechanism

Green-Light Thinking

- Deferred judgement
- Brainstorming
- Focus on quantity
- Idea fluency

Red-Light Thinking

- Judicial
- Decision making
- Follows green-light
- Focus on quality

The Key: *Always Separate Them!*

Critical Thinking Tools

The Affinity Diagram

Affinity Diagram = Idea Organizer

Step 1: Dump thoughts.

Step 2: Group similar ones.

Step 3: Name themes.

This spots hidden patterns fast.

Critical Thinking Tools

The Affinity Diagram

Example:

50 marketing ideas → "Free tools" cluster

Best for messy brainstorming or fixing broken systems.

Critical Thinking Tools

The Interrelationship Diagram

This tool **maps how issues connect**.

How it works:

1. List all problems
2. Draw arrows showing what causes what

Spot the root cause (most arrows pointing to it)

Critical Thinking Tools

The Interrelationship Diagram

Example:

- "Late deliveries" → Angry customers → Bad reviews
- Root cause? Probably "understaffed warehouse"

Why it rocks:

- Visualizes problem chains
- Finds the real fix

Critical Thinking Tools

Logic Tree

Logic Tree = Idea Generator

Need fresh solutions? Grow them like branches.

How:

1. Start with core goal (trunk)
2. Branch possible strategies
3. Split into actionable tactics

Critical Thinking Tools

Logic Tree

Example:

Boost sales?

→ Improve ads

→ Try TikTok

→ Partner with influencers

Why it rocks:

- Visualizes all options
- Sparks creative combos

Critical Thinking Tools

Decision-making Matrix

Decision Matrix = Your Pros/Cons Killer

Torn between options? Score them objectively.

How:

1. List choices (rows)
2. Add criteria that matter (columns)
3. Rate each 1-10

Decision Matrix

	Criterion A	Criterion B	Criterion C	Criterion D	Total Benefit
Solution 1					
Solution 2					
Solution 3					
Criteria Weights					

Critical Thinking Tools

Decision-making Matrix

Example:

Picking an AI Model for everyday use?

→ DeepSeek R1   

→ Perplexity  

→ Grok 3    

Why it wins:

- Kills emotional bias
- Reveals the smartest pick

AI Mana yang Paling Cocok Sebagai Default			Absolute Criteria		
			Free	No/High Rate Limit	Has Web Search & Cite Resource
			10	10	10
No	Sebuti	Score			
1	DeepSeek V3	33	1	1	1
2	DeepSeek R1	35	1	1	1
3	Perplexity	35	1	1	1
4	Gemini 3.0 Flash Thinking Expert	30	1	1	0
5	Gemini 3.0 Pro Experimental	30	1	1	0
6	Gemini 3.0 Flash Light	30	1	1	0
7	GPT-4o	30	1	0	1
8	GPT-4o mini	31	1	1	1
9	Grok 3	29	1	1	1
10	Claude Sonnet 3.7	10	1	0	0
11	Qwen2.5-Max	38	1	1	1

Bridging Gap Skills and Experience

How to Bridge **Skills & Experience Gap**

Internships and Co-op Programs

Give real-world experience and skills that employers want, making students stand out after graduation.

Volunteering and Personal Projects

Volunteering and personal projects prove your skills and passion to employers.

Online Courses and Certifications

Online courses let grads learn job-ready skills fast—making recruiters notice them.

Networking and Building Connections

Networking helps grads find jobs, mentors, and insider opportunities.

What do you think of this fenomena?

Zakka Fauzan

@zakkafm

Luar biasa, ada orang yang lulus kuliahnya belum setaun, udah pernah internship (@ 3-8 bulan) di Doku, OVO, Grab, dan Tiket. Gila emang persaingan sampe harus segininya.

Curriculum Vitae

A Curriculum Vitae (CV) is a **written overview** of a person's experiences and other qualifications for some certain opportunities (e.g. job applying, scholarship offer, etc)

<https://www.resume-now.com/job-resources/jobs/resume-statistics>

**“Curriculum Vitae is part of
an Investment, too”**

The **amount applicants** is undoubtedly *exponential*

The Facts

- On average, recruiters only **spend 7.4 seconds** on a single CV
- Big companies recruiters received **1000 CVs** monthly to their inboxes

<https://www.resume-now.com/job-resources/jobs/resume-statistics>

In a scale of 1-10,

LinkedIn Checklist

Check if your LinkedIn current condition is aligned with example best practices

No	Component	Example Best Practices	Checklist
1.	Personalized LinkedIn profile link	Not followed by numbers/stripes/underscores behind the names	✓/X
2.	Header	- The image that represents your professional/personal values/passion/job - Adds informative data (e.g., a motto) - Image can be sourced from open design platforms (e.g., Canva) or a design application (e.g., Adobe/Corbis)	✓/X
3.	Profile Photo	Self-taken (it's not the same as the KTP type of photo) Professional-looking headshot (it covers 1/3 of the whole photo) Professional attire and a clear background (don't let people be distracted by the background compared to your photo itself) Smiles with a smile	✓/X
4.	Headline	- A bunch of words that represent you - Active professional status (e.g., Business Manager/Student) - Career aspiration/jargon (e.g., Aspiring Digital Marketer) - Achievement (e.g., KPL awarded BSM F&B Universitas Trisakti President) - Skillset/specific type of work (e.g., Full-Stack Developer, Creative Expert, Experienced in Human-Trafficking cases)	✓/X

How to get it?

If you don't have the format, worry not, I'll share :)

In a scale of 1-10,
How do you rate your LinkedIn quality?

1

5

10

Impact of Networking to Consider

Seventy Eight (78) Percent

Employers mentioned they **hired** candidate through a social network—notably someone they discovered on LinkedIn.

(**JOBVITE** survey on **Forbes**)

Seventy (70) Percent

Professionals perceive hired at a company where they have professional connections.

(**LinkedIn** Research on **VICE**)

Sixty Three (63) Percent

of all career opportunities are found through contacts, which networking can be the most effective way you'll land the best job.

(**Forbes**)

The Right Ones You Have to Network With

Amongst millions of categories, always look for the right ones

Recruiters

An HR-type of group who sees candidate based on these categories:

- "Human side"
- Passion/Excitement
- Attitude/Behavior
- Communication

User

A hiring manager who sees candidate from technical perspectives based on these categories:

- Technicalities (e.g., tools)
- Interest with the role
- Knowledge about the role & company

CEO

A company owner/highest stakeholders (BOD) who sees candidate from strategic POV based on these categories

- Interest with the vision-mission
- Knowledge about the industry
- Contribution towards the company

Landing Your Dream Job: Top Employability Skills for New Grads

Welcome to this presentation on the essential employability skills that will help you land your dream job. In today's competitive job market, it's not just about what you know, but how you apply that knowledge. In fact, 65% of employers believe soft skills are more important than technical skills. This presentation will cover critical skills like communication, problem-solving, teamwork, adaptability, tech proficiency, and leadership, and provide actionable steps to develop these skills.

Communication Skills: The Foundation of Success

Effective communication is the cornerstone of any successful career. It encompasses verbal clarity, confident articulation, active listening, and professional writing. It also involves non-verbal cues like body language, eye contact, and presentation. Imagine a graduate who clearly and confidently communicates project updates, leading to increased efficiency versus one who causes confusion due to poor communication. Mastering these skills is key to thriving in the workplace.

Verbal Communication

Speak clearly and listen actively.

Written

~~Non-Verbal Communication~~
Professional writing and communication.

Non-Verbal Communication

Pay attention to body language and personal presentation.

Problem-Solving and Critical Thinking: Navigating Challenges

Problem-solving and critical thinking are vital for navigating workplace challenges. These skills involve analyzing issues, identifying solutions, and making informed decisions. Techniques such as SWOT analysis, root cause analysis, and design thinking can be invaluable in this process. For example, a fresh graduate who identifies a bottleneck in a process and proposes a solution can save the company time and money. Developing these abilities is essential for making impactful contributions.

Analyze

Identify the issue at hand.

Solve

Develop informed solutions.

Decide

Make thoughtful decisions.

Teamwork and Collaboration: Achieving More Together

Teamwork and collaboration are essential for achieving common goals in a diverse work environment. Teams that collaborate effectively are five times more likely to be high-performing. Active participation, conflict resolution, and shared responsibility are crucial strategies. Consider a graduate who integrates into a new team and contributes to a project that surpasses expectations. These skills drive success and innovation.

Active Participation

Engage in team discussions and activities.

Conflict Resolution

Address disagreements constructively.

Shared Responsibility

Take ownership of team tasks and outcomes.

Adaptability and Flexibility: Thriving in a Dynamic Environment

Adaptability and flexibility are crucial for thriving in today's dynamic work environment. These skills involve embracing change, learning new skills, and adjusting to evolving priorities. Notably, 74% of employees are ready to learn new skills or completely retrain to remain employable. A graduate who quickly learns new software or adapts to a change in project scope without complaint demonstrates these qualities. This ability to adjust to change and learn new skills ensures long-term career success.

Embrace Change

Welcome new challenges and transitions.

Learn New Skills

Be open to acquiring new knowledge and abilities.

Adjust Priorities

Adapt to changing project requirements.

Technology Proficiency: Mastering Digital Tools

Technology proficiency is a must-have in today's job market. Essential skills include data analytics, cloud computing, and cybersecurity awareness. With the demand for tech skills growing twice as fast as non-tech skills, leveraging technology improves efficiency, productivity, and innovation. For instance, a graduate who uses Excel to analyze sales data and create insightful marketing reports showcases this proficiency. Mastery of these skills will drive career growth and success.

Leadership and Initiative:

Taking Ownership and Driving Results

Leadership and initiative are crucial for driving results and career advancement. These qualities involve demonstrating initiative, taking ownership of tasks, and inspiring others. A proactive attitude, responsibility, and the ability to motivate and influence are vital. For example, a fresh graduate who volunteers to lead a project or takes on additional responsibilities demonstrates leadership. Cultivating these traits will set you apart as a valuable asset.

Conclusion:

Invest in Your Future

In conclusion, mastering key employability skills such as communication, problem-solving, teamwork, adaptability, technology proficiency, and leadership is essential for landing your dream job and building a successful career. Actionable steps include taking online courses, attending workshops, and volunteering. As Robert Greene said, "The future belongs to those who learn more skills and combine them in creative ways." Invest in your future today.

Online Courses

Workshops

Volunteering
